

WAVE|Shield

Science's answer to radiation.

Made in USA
US Patent No. 6,369,399
Eletromagnetic Radiation Shielding Material & Device

WHO Warns that the Use of Cell Phones Links to Cancer

Lyon, France, May 31, 2011 -- The WHO/International Agency for Research on Cancer (IARC) has classified radiofrequency electromagnetic fields as possibly carcinogenic to humans (Group 2B), based on an increased risk for glioma, a malignant type of brain cancer, associated with wireless phone use.

Why is Electromagnetic Radiation Harmful?

In 1994, Nobel prize winners, Gilman & Rodbell determined that our body's cells communicate with each other via very low & subtle electromagnetic frequencies. This signal carries all the vital information through a process called signal transduction and are translated into biochemical and physiological processes of our body. EMR can potentially distort and disrupt these cellular communication signals resulting in abnormal metabolism and consequently illness.

Thousands of studies has been done on the non-specific health effect of EMF such as sleep disorder, male infertility, short-term memory loss, depression, mood swings, fatigue, palpitations of the heart, immune

system degradaton, tinnitus, DNA damage and the list goes on.

How Does WaveShield Work?

WaveShield is made of a patented polymer compound of a high dielectric constant. In the presence of external electromagnetic field, Waveshield emit very low & subtle frequencies of electromagnetic oscillations that resemble those used by living cells in the body. These oscillations compensate and neutralize the harmful effects of EMR generated by electrical devises while simultaneously providing support for cellular functions in the body.

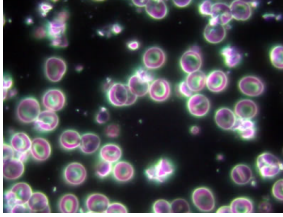

WaveShield does not reduce the intensity of EMR from your device. It neutralizes the negative effects of EMR by modulating ultra low frequencies onto the EMR frequencies rather than reducing the EMR intensity. Visit www.emffrequency.com for more information.

WaveShield Product Information

Protective Coverage : 1m radius
Life Span : 3 years when placed on source of radiation
Placement : Phone or phone casing rear, centered

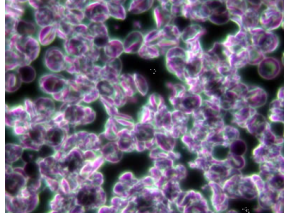

Actual 'Live' Blood Cells Test Conducted on the Effects of EMR.

Blood sample without cellphone (Control)

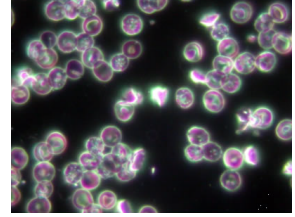

The blood cells are nicely spaced apart and with distinct circular shapes.

Blood sample while using cellphone for 5 minutes without protection.

The blood cells are now clustered together, forming a chaotic pattern.

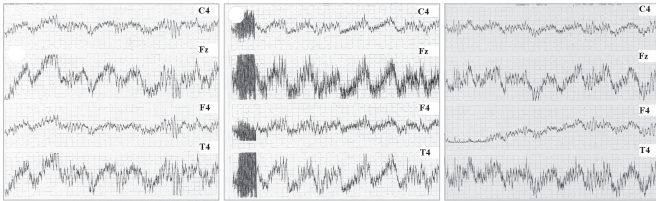

Blood sample while using cellphone for 5 minutes with WaveShield protection.

The blood cells have undergone a reversal effect from chaotic to almost normal pattern.

WaveShield neutralizes the electromagnetic stress and excitement caused by cellular phones on the brain ¹

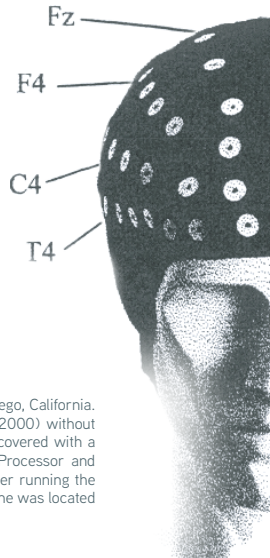

Brain EEG readings

Control with no cellular phone.

Cellular phone without any protection.

Cellular phone with WaveShield's protection.

¹This controlled test was conducted at the laboratory of SA Biomedical Instrument Company, San Diego, California. The human subject was introduced to the influence of a cellular phone (Samsung model #SCH- 2000) without WaveShield protection and subsequently with WaveShield protection. The head of the subject was covered with a standard Electro-cap connected with 4 channels of Bioelectric Amplifier equipped with Analog Processor and Anti-aliasing Filters. The data were provided for the following 4 electrodes: C4, Fz, F4 and T4. After running the control test for 3 minutes, each of the EMR influenced tests was run 3 minutes each. The cellular phone was located on the right side of the head at standby position.

The man behind WaveShield

The WaveRider technology is the brainchild of Dr. Igor Smirnov. A brilliant scientist-inventor, Dr. Smirnov specializes in advanced research on the influence of low frequency electromagnetic oscillations on human cellular physiology.

Dr. Smirnov is most well-known for his pioneering invention of the Molecular Resonance Effect Technology (MRET). His MRET technology has helped heal people suffering from a wide range of diseases, from cancer, diabetes, Alzheimer disease, to psoriasis and chronic fatigue syndrome.

Dr. Smirnov is a nuclear engineering graduate from St Petersburg Naval Academy, where he also obtained a MSc in Mechanical and Bioengineering. He received a PhD in Clinical Psychology from St Petersburg State University. Dr. Smirnov has written for many international scientific publications including European Journal of Scientific Research, International Journal of Biophysics, Journal of Research in Biology, among others.

WaveShield Has Been Scientifically Validated On/In:

Peer-review Science Journals

- European Journal of Scientific Research
- Journal of Microwave Power and Electromagnetic Energy
- Journal of Nanotechnology and Smart Materials
- Jacobs Journal of Biotechnology and Bioengineering

Independent Labs

- Namco Global Services Ltd
- Molecular Diagnostic Services Inc
